

HTL-C

The foldable Travel-Lifter

- Handy and agile
- Dismantling without tools
- Easy to transport
- Enables safe trips

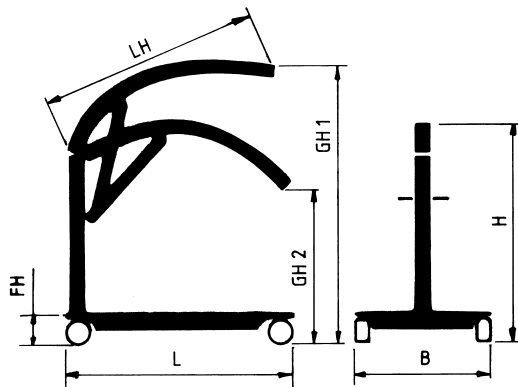

The HTL-C is a small and agile Lifter, that can be used nearly everywhere thanks to its small measurements. You can dismantle the Lifter easily and without tool. The connections are locked by screws with locking handle that offer a safe hold, but also can be opened with the bare hand. The lifter is with high probability the first universally employable Lifter, that can be transported in a bag similar to a golfing-bag (bag separately available).

The Lifter is suitable ideally for the home-care or for travelling. Also mounting a car is easily possible with the Travel-Lifter. It enables people with handicap e.g. to reach a job or to undertake trips.

We recommend the application with the special sling 49-Sa (with short belts) or with backrest and normal seat 29/32-S (canvas), with chains (Item No. 27).

	Technical features	
B 1	Width chassis, narrowest position,	580 mm
B 2	Width chassis, spread position,	790 mm
L	Length chassis	970 mm
FH	Height chassis (Castors Standard 100 mm diameter)	140 mm
H	Height Lifter	1100 mm
GH 1	Total height ground / tip of arm, highest position,	1660 mm
GH 2	Total height ground / tip of arm, lowest position,	980 mm
LH	Length lifting-arm	700 mm
	Entire net weight kg	20 kg
	Net weight top kg	7 kg
	Net weight chassis kg	13 kg
	Working load kg	100 kg
	Colour	RAL 3004 crimson
	Transport bag for HTL-C	Item no. 90432

The appliance by the manufacturer with decades of experience. Produced in Germany, tested according to the newest safety standards (according to DIN EN 10535 with more than 10.000 lifting movements with load).

Subject to technical alterations. Pictures = Examples for possible designs.

Our company is producing rehabilitation aids for people with handicaps since now 50 years. The mobile HOYER-Lifter and HOYER Overhead Systems essentially contribute to the independence of

the users and to the relief of the care-persons. Our appliances correspond to the needs of the users, as well as the care-persons, and to the newest requirements of technique and legislation.

HOYER also produces Pool-Lifters, elevators for handicapped persons, stairlifts or platform-lifts and other innovative developments.
