

## HL-200

### HOYER Elektro-Lifter

- Increased load capacity of 200 kg
- New chassis adjustment by pedal
- New swivel bar with many possibilities to adapt slings
- Big lifting range
- Solid implementation

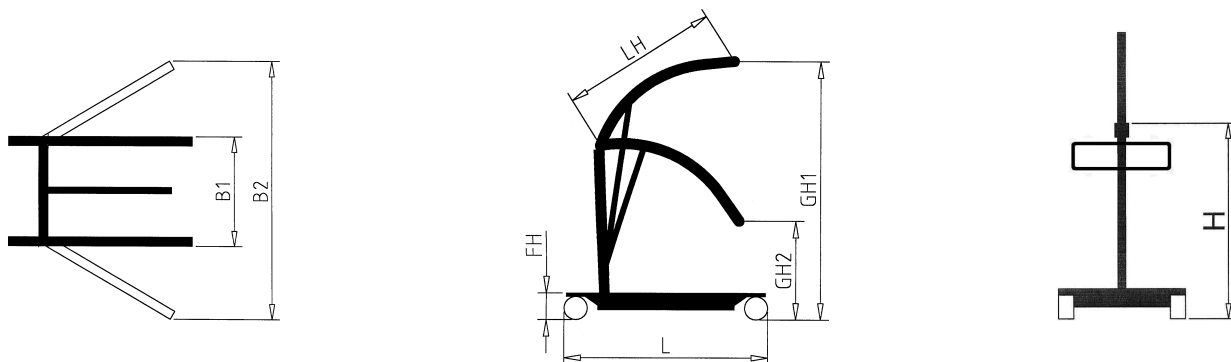

The HL-200 is a solid lift with a lifting capacity of 200 kg. Thanks to its big lifting range it is even possible to lift a person from the ground.

The low chassis can easily be spread by a pedal. The pedal locks in the end position, accidental opening of the chassis while driving is reliably prevented.

The new form of the swivel bar with four double hooks makes possible manifold possibilities to adapt slings and lifting belts.

The lift is characterised by a solid processing and a stable implementation. By plenty of accessories, it has versatile uses.

	Technical features	
B 1	Width chassis, narrowest position,	654 mm
B 2	Width chassis, spread position,	1080 mm
L	Length chassis	1064 mm
FH	Height chassis (Castors Standard 100 mm diameter)	137 mm
GH 1	Total height ground / tip of arm, highest position	1935 mm
GH 2	Total height ground / tip of arm, lowest position	750 mm
LH	Length lifting-arm	960 mm
	Entire net weight	44,5 kg
	Working load	200 kg
	Colour	

The HL-200 is equipped with an emergency stop and a mechanical emergency lowering at the head of the spindle motor. The lift is charged by an external charger. The long living accumulators make it independent from the mains.

The appliance by the manufacturer with decades of experience. Produced in Germany, tested according to the newest safety standards (according to DIN EN 10535 with more than 10.000 lifting movements with load).

Subject to technical alterations. Pictures = Examples for possible designs.

Our company is producing rehabilitation aids for people with handicaps since now 50 years. The mobile HOYER-Lifter and HOYER Overhead Systems essentially contribute to the independence of

the users and to the relief of the care-persons. Our appliances correspond to the needs of the users, as well as the care-persons, and to the newest requirements of technique and legislation.

HOYER also produces Pool-Lifters, elevators for handicapped persons, stairlifts or platform-lifts and other innovative developments.
