

# One of a kind

The P-Access is the only electric standing wheelchair with an articulated lifting bar.

## Why a front lifting bar?

When moving outdoors, all wheelchair types encounter height-related obstacles (uneven ground, cobblestones, stones, pebbles, small steps, etc.) that cause uncomfortable jolts.

Without the lifting bar, the wheelchair and its user absorb the impacts. The ride is uncomfortable, and that causes a variety of problems, such as back pain.

Jointed in the middle, the lifting bar absorbs 50% of obstacles encountered. It provides unrivalled comfort during outdoor excursions.

With its 55 amps of battery power, the P-Access already has a range of 20 km, but with the 80 amp option, this can be increased to 35 km.

It is therefore essential to choose a comfortable wheelchair so as to take full benefit from this battery life.

## Technical Specifications

	Total length with footrest up	75 cm		Footrest adjustable to the rear	Height adjustment 80 mm
	Total length with footrest down	97 cm		Front wheels	Ø 200 x 50 mm with maintenance-free tyres
	Width standard configuration	65 cm		Rear wheels	Ø 360 x 80 mm inflatable
	Width narrow armrest	63 cm		Electric propulsion mechanism	2 motors 350 W
	Seat height	50 cm at the front, sloping 5° to the back		Speed	6 or 10 km/h depending on version
	Backrest height	460 or 500 mm		55 A range	> 20 km
	Turning radius	73.5 cm		80 A range	> 35 km
	Frame with articulated front lifting bar	Rigid steel, epoxy paint		Batteries	2 batteries AGM of 55 A or 80 A
	Seat width	45 cm		Charger	1 charger 8 A 24 V
	Electrically reclining back +/- 40°	Fire-retardant washable tension fabric (M3)		Standard user max weight	120 kg
				custom user max weight	140 kg
				Wheelchair weight Without batteries	88 kg
				With batteries	55 A : 104 kg 80 A : 118 kg

Verticalisation LPPR: 4168966

**CE** The compliance of the apparatus with annex I of EU directive 93/42/CEE is certified by the CE label.

**P-ACCESS**

# P-Access: simple and efficient!

The new generation of P-Access confirms its strong points:

- Mechanic **simplicity** that guarantees the wheelchair's reliability
- Performance **efficiency** guarantees comfort when seated as well as high-quality verticalisation
- A **pleasant ride** due to the front lifting bar and the rear suspension
- All within a **controlled budget**

Wheelchair produced using reliable technical solutions and acclaimed electronics.

**Ergonomics of the armrests** which adapt to the shape of the forearms.

**Ergonomic knee support**, adjustable 3-ways.

**Comfortable lifting bar** that absorbs 50% of ground irregularities at the front and is complemented by suspension with an adjustable shock absorber at the back, providing exceptional seated comfort.

**Foot plates:** one-piece, adjustable, ingenious locking system.

**Front safety wheels** ensure stability in the standing position.

**Standard electric adjustment of backrest angle** which provides continuous compensation both when sitting and standing up.

**Retractable clothes guard.**

**Rigid seat, adjustable in height and depth.**

**LED road kit.**

**Powerful standard motors (2 x 350 watts)**
